

## **“Unexplored Futures”**

With the implementation of the project **“Unexplored Futures”**, Junior High School and High School students in Athens, Patra, Crete, Ioannina and Thessaloniki meet those professions that are shaping the future labor market.

Through conversations with employees of Dialectica and other professionals, who undertake the role of mentors, students are introduced to emerging professions, new trends and industries that have had a rapid development and that will play a major role in the future economy.

The live sessions become a ground for conversations that contribute to the students’ more well-informed decisions, regarding their academic and professional future and that help the new generation get a better understanding of the current labor market, which they will enter soon.

The project is implemented throughout the year 2022, with the support of Dialectica.
