

For a safer and better life

How does risk management contribute to pursuing a safer, better quality and longer life?

Which are the most important and helpful factors towards this goal, and how crucial is the role of technology?

During the school year 2020-2021, students from 3 Junior High Schools and High Schools from different regions of Greece connect with experienced professionals, discuss with them, and get informed about topics related to road safety, sustainable cities and environment, the role of technology in the development of the health sector, and discover their importance in pursuing a safer everyday life.

The project "For a safer and better life" is implemented with the support of Interamerican.
